

CASE STUDY

Supermarket Leads the Way in Refrigerant Lifecycle Management

BACKGROUND

About the Supermarket

This family-owned supermarket serves Texans with over 400 locations. They provide TexMex and Latinx products and prepared foods, serving as a pillar within Texan communities.

About A-Gas

A-Gas is building a sustainable future through the supply of lower global warming refrigerants combined with responsible lifecycle management of refrigerant gases. Through our first-class recovery, reclamation, and repurposing processes, we capture refrigerants and fire protection gases for future reclamation or destruction, preventing harmful release into the atmosphere.

About Rapid Recovery

Rapid Recovery is A-Gas' premier refrigerant recovery service. Across the globe, we provide a safe and fast on-site recovery service, which includes industry-leading EPA documentation and refrigerant analysis.

CHALLENGE

This supermarket urgently needed a significant volume of reclaimed R22 just before Christmas in 2021. When their usual supplier was unable to fulfill their needs, our customer was in a bind. They reached out to A-Gas to help as we have an existing relationship in refrigerant lifecycle management through our Rapid Recovery network.

AT A GLANCE

Challenges

- Urgent reclaimed R22 need
- Regular on-site refrigerant recovery & supply service
- Future refrigerant strategy

Benefits

- Environmental: Responsible refrigerant recovery to prevent harmful release into the atmosphere
- Economic: On-site refrigerant recovery service, 10x faster than traditional recovery methods
- Other: EPA & DOT documentation

A-Gas' partnership helps our customers continue to provide exceptional service to their communities while meeting their sustainability goals.

TAYLOR FERRANTI

Former Commercial Vice President,
Refrigerant Management, A-Gas

SOLUTION

Through A-Gas' Rapid Recovery service, the supermarket receives on-site, efficient refrigerant recovery services across its stores. A-Gas' EPA-Certified Rapid Recovery technicians go to stores, swiftly recover refrigerants at 10x the speed of traditional equipment, deliver EPA documentation, and then provide our customer with a matching volume of AHRI-certified refrigerant gas. Through this product assurance, our customer has confidence they will be able to continue to have access to new and reclaimed refrigerants combined with all refrigerant lifecycle management services.

RESULTS

Beyond safe recovery and providing refrigerant, A-Gas met the customer's critical, time-sensitive needs when they urgently needed reclaimed R22 in December 2021. A-Gas' dedicated and efficient orders, operations, and support teams delivered 6,000 pounds of R22 in two days, at Christmas.

CONCLUSION

Understanding that our customer needed a true partner to understand their needs and sustainability goals, A-Gas helped them proactively strategize for all their future refrigerant and refrigerant lifecycle management requirements. It also exemplifies our customer's leadership in sustainable refrigerant management and commitment to Texas. They will continue to work with A-Gas for their refrigerant needs.
